

Help for non-English speakers

If you need help to understand the information in this policy, please contact the school on 93064144.

Purpose

To explain to parents/carers, students and staff the processes Glenroy Central PS will follow to safely manage the provision of medication to students while at school or school activities, including camps and excursions.

Scope

This policy applies to the administration of medication to all students. It does not apply to:

- the provision of medication for anaphylaxis which is provided for in our school's Anaphylaxis Policy
- the provision of medication for asthma which is provided for in our school's Asthma Policy
- specialised procedures which may be required for complex medical care needs.

Implementation

If a student requires medication, Glenroy Central PS encourages parents to arrange for the medication to be taken outside of school hours. However, the school understands that students may need to take medication at school or school activities. To support students to do so safely, Glenroy Central PS will follow the procedures set out in this policy.

Authority to administer

If a student needs to take medication while at school or at a school activity:

- Parents/carers will need to arrange for the student's treating medical/health practitioner to provide written advice to the school which details:
 - the name of the medication required
 - the dosage amount
 - the time the medication is to be taken
 - how the medication is to be taken
 - the dates the medication is required, or whether it is an ongoing medication
 - how the medication should be stored.
- In most cases, parents/carers should arrange for written advice to be provided in a Medication Authority Form which a student's treating medical/health practitioner should complete. **Appendix A**
- If advice cannot be provided by a student's medical/health practitioner, the Principal (or their nominee) may agree that written authority can be provided by, or the Medication Authority Form can be completed by a student's parents/carers.
- The Principal may need to consult with parents/carers to clarify written advice and consider student's individual preferences regarding medication administration (which may also be provided for in a student's Student Health Support Plan).

Parents/carers can contact Glenroy Central PS for a Medication Authority Form.

Administering medication

Any medication brought to school by a student needs to be clearly labelled with:

- the student's name
- the dosage required
- the time the medication needs to be administered.

If a student needs to take medication at school or a school activity, the Principal (or their nominee) will ensure that:

1. Medication is administered to the student in accordance with the Medication Authority Form so that:
 - the student receives their correct medication
 - in the proper dose
 - via the correct method (for example, inhaled or orally)
 - at the correct time of day.
2. A log is kept of medicine administered to a student. **(Appendix B)**
3. Where possible, two staff members will supervise the administration of medication.
4. The teacher in charge of a student at the time their medication is required:
 - is informed that the student needs to receive their medication
 - if necessary, release the student from class to obtain their medication.

Self-administration

In some cases, it may be appropriate for students to self-administer their medication. The Principal may consult with parents/carers and consider advice from the student's medical/health practitioner to determine whether to allow a student to self-administer their medication.

If the Principal decides to allow a student to self-administer their medication, the Principal may require written acknowledgement from the student's medical/health practitioner, or the student's parents/carers that the student will self-administer their medication.

Storing medication

The Principal (or their nominee) will put in place arrangements so that medication is stored:

- securely to minimise risk to others
- in a place only accessible by staff who are responsible for administering the medication
- away from a classroom (unless quick access is required)
- away from first aid kits
- according to packet instructions, particularly in relation to temperature.

For most students, Glenroy Central PS will store student medication in the first aid room.

The Principal may decide, in consultation with parents/carers and/or on the advice of a student's treating medical/health practitioner:

- that the student's medication should be stored securely in the student's classroom if quick access might be required
- to allow the student to carry their own medication with them, preferably in the original packaging if:
 - the medication does not have special storage requirements, such as refrigeration
 - doing so does not create potentially unsafe access to the medication by other students.

Warning

Glenroy Central PS will not:

- in accordance with Department of Education and Training policy, store or administer analgesics such as aspirin and paracetamol as a standard first aid strategy as they can mask signs and symptoms of serious illness or injury
- allow a student to take their first dose of a new medication at school in case of an allergic reaction. This should be done under the supervision of the student's parents, carers or health practitioner
- allow use of medication by anyone other than the prescribed student except in a life-threatening emergency, for example if a student is having an asthma attack and their own puffer is not readily available.

Medication error

If a student takes medication incorrectly, staff will endeavour to:

Step	Action
1.	If required, follow first aid procedures outlined in the student's Health Support Plan or other medical management plan.
2.	Ring the Poisons Information Line, 13 11 26 and give details of the incident and the student.
3.	Act immediately upon their advice, such as calling Triple Zero "000" if advised to do so.
4.	Contact the student's parents/carers or emergency contact person to notify them of the medication error and action taken.
5.	Review medication management procedures at the school in light of the incident.

In the case of an emergency, school staff may call Triple Zero "000" for an ambulance at any time.

Communication

This policy will be communicated to our school community in the following ways

- Included in staff induction processes
- Available publicly on our school's website
- Discussed at staff briefings/meetings as required
- Discussed at parent information nights/sessions
- Made available in hard copy from school administration upon request

Evaluation

This policy has been endorsed by the principal and will be reviewed every 3 years or more often if necessary due to changes in regulations or circumstances.

Appendix A

MEDICATION AUTHORITY FORM

For students requiring medication to be administered at school

This form should, ideally, be signed by the student's medical/health practitioner for all medication to be administered at school but schools may proceed on the signed authority of parents in the absence of a signature from a medical practitioner.

- For students with asthma, [Asthma Australia's School Asthma Care Plan](#)
- For students with anaphylaxis, an [ASCIA Action Plan for Anaphylaxis](#)

Please only complete the sections below that are relevant to the student's health support needs. If additional advice is required, please attach it to this form.

Please note: wherever possible, medication should be scheduled outside school hours, eg medication required three times daily is generally not required during a school day – it can be taken before and after school and before bed.

Student Details

Name of school: _____

Name of student: _____ Date of Birth: _____

MediAlert Number (if relevant): _____

Review date for this form: _____

Medication to be administered at school:

Name of Medication	Dosage (amount)	Time/s to be taken	How is it to be taken? (eg oral/topical/injection)	Dates to be administered	Supervision required
				Start: / / End: / / OR <input type="checkbox"/> Ongoing medication	<input type="checkbox"/> No – student self-managing <input type="checkbox"/> Yes <input type="checkbox"/> remind <input type="checkbox"/> observe <input type="checkbox"/> assist <input type="checkbox"/> administer
				Start: / / End: / / OR <input type="checkbox"/> Ongoing	<input type="checkbox"/> No – student self-managing <input type="checkbox"/> Yes <input type="checkbox"/> remind

				medication	<input type="checkbox"/> observe <input type="checkbox"/> assist <input type="checkbox"/> administer

Medication delivered to the school

Please indicate if there are any specific storage instructions for any medication:

Medication delivered to the school

Please ensure that medication delivered to the school:

- Is in its original package
- The pharmacy label matches the information included in this form

Supervision required

Students in the early years will generally need supervision of their medication and other aspects of health care management. In line with their age and stage of development and capabilities, older students can take responsibility for their own health care. Self-management should be agreed to by the student and their parents/carers, the school and the student's medical/health practitioner.

Please describe what supervision or assistance is required by the student when taking medication at school (e.g. remind, observe, assist or administer):

Monitoring effects of medication

Please note: School staff **do not** monitor the effects of medication and will seek emergency medical assistance if concerned about a student's behaviour following medication.

Privacy Statement

We collect personal and health information to plan for and support the health care needs of our students. Information collected will be used and disclosed in accordance with the Department of Education and Training's privacy policy which applies to all government schools (available at: <http://www.education.vic.gov.au/Pages/schoolsprivacypolicy.aspx>) and the law.

Authorisation to administer medication in accordance with this form:

Name of parent/carer: _____

Signature: _____ Date: _____

Name of medical/health practitioner: _____

Professional role: _____

Signature: _____ Date: _____

Contact details: _____

Appendix B

Medication Management Procedures

Glenroy Central Primary School has developed procedures for the appropriate storage and administration of prescribed and non-prescribed medicines to students by school staff with reference to individual student medical information. The school will not, in accordance with the Department Education policy, store or administer analgesics as a standard first aid strategy as that can mask signs or symptoms of serious injury or illness. In case of a medical error and a student takes medication incorrectly staff will refer to the students Health Support Plan, ring the Poisons Information Line 13 11 26 and give details, act upon their advice and call triple zero if needed, contact the parents, guardians or emergency contact person and review the medication management procedures.

Student Information

Parents and/or carers are required to keep the school informed of current medical contact details concerning students and any current medical conditions and appropriate medical history. Students who require an individual management plan is provided to the school by the student's parents/carers and contains details of:

- the usual medical treatment needed by the student at school or on school activities
- the medical treatment and action needed if the student's condition deteriorates
- the name, address and telephone numbers for an emergency contact and the student's doctor

Staff will not allow a student to take their first dose of a new medication at school in case of an allergic reaction.

Administration of Prescribed Oral Medication

Parents and guardians are required to inform the Principal or designated First Aid Officer in writing of any prescribed medication that students need to take in school hours by completing the Medical Authority Form. Where medication is required in spontaneous situations, detailed administration instructions should be provided, for example in the case of asthma attacks. Medication Administration Permission Forms are available from the Administration Building and should be completed and signed by the parent and guardian.

Certain students are capable of taking their own medication (usually tablets) while other students will need assistance. This information will be recorded on the individual student's management plan.

All medication sent to school is to be administered by the allocated First Aid Officer and parents and guardians are required to supply medication in a container that gives the name of the medication, name of the student, the dose, and the time it is to be given.

Where medication for more than one day is supplied, it is to be locked in the storage cupboard in the school administration office.

Administration of Analgesics (Pain Medication)

Analgesics are only to be given following permission of parents or guardians and are to be issued by a First Aid Officer who maintains a record to monitor student intake. Analgesics are to be supplied by the parents and not stored in student school bags.

Asthma

Every student with asthma attending the school has a written Asthma Action Plan, ideally completed by their treating doctor or paediatrician, in consultation with the student's parent and carer. This plan is attached to the student's records and updated annually or more frequently if the student's asthma changes significantly (Refer to Asthma Policy).

Diabetes

Students who have been identified with having diabetes will have a written Diabetes Action Plan completed by their treating doctor or paediatrician, in consultation with the student's parent and carer.

This plan is attached to the student's record and updated if the students condition changes (Refer to Diabetes Policy).
